A few words regarding the case Leavers' Association. In a young man 21 years old and serving a while in prison. When I turned 21 I was informed that I was on my own no more leaving case, I found myself left and didn't see my entitlements. I had worked with the idea of going to college on release, but had no idea how I was going to fund my course or even how to apply. Then I met Darren Coyne and got introduced to the case Leavers' Association, I remember the first time I had Darren check that I wanted to do, and he seemed interested he started to talk to me regarding what I was entitled to. 3 months on and I'm back in contact with Leavers case having talks about funding being put in place for the courses I want to do. I'm being released in 4 months and hope to start and finish a 12 month access course in maths and English, and then further myself with a degree in maths in university.

It is just to say that my life is very much back on track, and that I wouldn't be where I am today if it wasn't for case leavers. The case leavers' Association have made my dreams of a fresh start with a education possible.
